

OUR 4-STEP APPROACH
to guarantee objectives
are met is...

P.I.P.E.

Plan objectives daily to meet short- and long-term goals.

Inspect all tasks before, during and after completion.

Prevent incidents and delays proactively with great planning and excellent execution.

Evaluate performance of individual tasks to ensure constant improvement of efficient operations.

Triple Nickel Fabricators is setting a new standard of excellence in industrial pipe fabrication.

We provide piping and other fabrication solutions for agriculture, chemical, oil & gas, power generation, marine, mining, pulp & paper, and waste & water. We work with carbon steels, stainless steels, nickel alloys, aluminum, and specialty alloys. We focus on quality, accuracy, and on-time delivery - that is why we monitor our workload based on estimated man-hours rather than spool count.

Prefabbing pipe is only efficient if it is completed accurately.

Triple Nickel Fabricators only accept projects that fit our capabilities so that we ensure you get the best results. Our in-house, Certified Welding Inspector's focus is to guarantee that all your standards are exceeded every time.

TRIPLE NICKEL

FABRICATORS

Our newly constructed 15,000 sq.ft. high-bay facility allows us to offer continuous fabrication without delays due to inclement weather.

We provide:

- Industrial pipe spools, modules, and skids
- Agricultural hoppers
- Custom storage bins
- Bulk conveyor systems
- Pump & Motor skids
- Platforms and Handrails
- Ballast and bulk piping
- Heavy ductwork fabrication
- Bulk storage tanks & silos

Our only priority is your priority.

We complete your orders on time by scheduling our work based on your delivery date. Our simplified management processes assist with quick and worry-free priority changes when you request. *We devote our undivided attention to your company's needs.*

Our welding procedures and welders are qualified in accordance with ASME Section 9.

We offer full traceability through lab tested ASME B31.1 & B31.3, and API 1104 welding procedures for GMAW, GTAW, FCAW, SAW, and SMAW processes. We can also provide additional client specific procedures upon request.

All tested on-site to meet industry standards and your design specifications.

Let us **set a new standard of excellence for your fabrication needs.**
